Agility Hands-on Workshop

Agility is spreading rapidly in the corporate world fueled by heightened expectations for time-to-market, productivity and customer satisfaction. Yet, its adoption is sometimes met with skepticism and anxiety. The differences in ways of working between agile and traditional methods raise questions like: What is it? What are the benefits? What does it mean for me? Will I be able to adapt?

This workshop demystifies agile ways of working. Using two of the most popular agile frameworks Design Thinking and Scrum it takes you through a full innovation cycle of understanding, envisioning, designing and delivering a new product. Participants will practice and experience hands-on what the core elements and practices of working in agile ways are and what they mean for them.

Agenda

1. Introduction to agility

   - Demystifying agility
   - What does agility mean for me?

2. Design Thinking Simulation

   - Introduction to Design Thinking
   - Practice of the Understand, Observe, Point of View and Ideate phases
   - Design Thinking next steps and Q&A

3. Scrum Simulation

   - Introduction to Scrum
   - Practice of Sprint Planning, Scrum Board and Daily Scrum methods
   - Scrum next steps and Q&A

Deliverables

The workshop will create sample deliverables from the Design Thinking and Scrum frameworks including:
- ✓ Semantic Analysis
- ✓ Personas
- ✓ User Stories
- ✓ Product & Sprint Backlog
- ✓ Scrum Board

Contact

Please contact info@forward-intelligence.com if you would like to find out more.

Benefits

- ✓ Understand the core concepts of agility using Design Thinking and Scrum
- ✓ Gain hands-on insights into and practice agile ways of working
- ✓ Understand how different agile frameworks can be combined and applied to personal work situations

This training is an experience training and does not cover the full extent of the included frameworks. It does not replace a comprehensive training or certification.
